Study Recruitment Information

Evaluation of the Designing Artificial Intelligence Curricula for All Undergraduates Grant

Researchers at the University of Kentucky's Evaluation Center are conducting an evaluation study for Designing Artificial Intelligence Curricula for All Undergraduates. The research study will inform participating institutions' efforts to design and implement Artificial Intelligence (AI)-focused courses as part of an AI Certificate and Curriculum available to their students. Student participants will take part in a focus group between January 2026 and January 2030 in person or via Zoom. Students will have a conversation with an evaluator guided by a series of follow-up questions regarding experiences, perspectives and beliefs relating to the AI-focused course. This study should take no more than 1 hour.

You may be eligible to participate if you are:

- Enrolled in an AI-focused course at a participating institution
- 18 years of age or older

Prior to participation, you can complete the consent form at the following link or QR code below:
