Study Recruitment Information

Evaluation of the Designing Artificial Intelligence Curricula for All Undergraduates Grant

Researchers at the University of Kentucky's Evaluation Center are conducting an evaluation study for Designing Artificial Intelligence Curricula for All Undergraduates. The research study will inform participating institutions' efforts to design and implement Artificial Intelligence (AI)-focused courses as part of an AI Certificate and Curriculum available to their students. Student participants will complete a 10-minute Qualtrics survey regarding their attitudes, experiences and perceptions related to the AI-focused course and using AI. The survey will be administered between January 2026 and January 2030. Participation in this study should take no more than 10 minutes and participants will receive extra credit in their AI-focused course.

You may be eligible to participate if you are:

- Enrolled in an AI-focused course at a participating institution
- 18 years of age or older

To take the survey, scan the QR code or follow the link below that directs you to the survey:
